HOW IT WORKS

If your company requires our managed first aid service, we will supply specific barcoded kits unique to your premises with tailored replenishment kits.

This ensures you have controlled and fully stocked kits on site every month to meet your staff and customer requirements, throughout your term agreement (typically 3 years).

For easy traceability, all first aid kits and sizes are individually barcoded for your site. Monthly collection, your kits will be scanned on arrival back at our depot and again on despatch to you.

Every month we will return fully replenished, identical size kit for you that will replicate the required specifications from your facility.

HSA QUALITY STANDARD

All the first aid kits are quality checked throughout replenishment process and before delivery to you.

Guaranteeing
you the same
consistent quality
week in and
week out.
